

Postgraduate opportunity in Astrophysics

The Faculty of Sciences, University of Adelaide is offering a postgraduate scholarship for PhD study in Astrophysics. Top-up scholarships are also available.

The new project, Lunar Ultra-high energy Neutrino Astrophysics using the SKA (LUNASKA), will be part of the design study for the international Square Kilometre Array of radio telescopes due for construction in 2010-2015. Project partners include collaborators at the Australia Telescope National Facility (ATNF) and Universities in the USA and Spain.

For further information on PhD projects, visit the LUNASKA website at:
www.physics.adelaide.edu.au/astrophysics/

If you have a good honours degree in physics, mathematics, engineering or computing you may be eligible to join this exciting new project
